

Valve Position Indicator Assembly

The Position Indicator provides a visual indication of valve position and regulation behavior.

Flow Stem / Mechanical Closure

The Flow Stem enables limiting the opening stroke of a control valve or for safety-ensured mechanical closure.

Typical Applications

- Surge Anticipating Valves Models 735-M and 735-55-M (For limiting the relief flow)
- Burst Control Valve Model 790-M (For burst flow setting)
