

BERMAD Fire Protection

FPSO Montara

Project Name	FPSO Montara
Country	Offshore N/W Australia
Application	On – Off Deluge Valves
Bermad Solution	FS-400E-6D Electro pneumatically controlled deluge valve with Local air trim to regulate the Instrument air

BERMAD Fire Protection

FPSO Montara

Optional Text	<p>All Deluge valves installed are suitable for offshore and marine environment using Ni.Al.Bronze boy and Monel trims. A customized air panel was installed to regulate the instrument air used for the deluge valve activation as well as an air reservoir to the pneumatic system. A remote activation feature allows remote activation from the control room. A manual reset PORV allows system to latch at open position once activated regardless of the solenoid or pneumatic pressure. Manual local reset is used to reset the valve to standby position</p>
