

# BERMAD Waterworks

## Beaver Creek Resorts High Pressure Pumping Stations

Project Name	Beaver Creek Resorts High Pressure Pumping Stations
Country	USA
Segment	WW
Application	High pressure pumping system for high altitude snow making and restaurant potable water feed system.
BERMAD Solution	840Q high pressure pump control valves to handle high head/high pressure pumps operating at 400psi. This project is pushing water up a mountain approximately 12-1,500 feet of elevation change.
Optional Text	This project went very smooth due to SGM Engineering's specification of BERMAD 840Q high pressure pump control valves.
