## **BERMAD** Irrigation

## Pressure Reducing Valve

Solenoid Controlled with Relief Override for Drip-Tape Applications

### IR-I20-55-3Q-b

The BERMAD Model IR-120-55-3Q-b is a hydraulically operated, diaphragm actuated control valve that accurately reduces higher upstream pressure to very low and stable preset downstream pressure. It either opens or shuts in response to an electric signal. The Bermad IR-120-55-3Q-b also serves as a Pressure Relief Valve, protecting the system even when in closed position.

## Pressure Reducing Drip-Tape

## Features and Benefits

- Solenoid Controlled PRV with Relief Override Feature
  - Protects downstream systemsRelieves supply pressure peaks
- Pressure Reducing Servo Pilot Controlled
  - Dynamic integrated needle valve
  - Settable to 0.5 bar; 7 psi
  - Very low hysteresis
- Engineered Plastic Valve with Industrial Grade Design
  Highly durable, chemical and cavitation resistant
  No internal bolts and nuts
- hYflow 'Y' Valve Body with "Look Through" Design
  Ultra-high flow capacity Low pressure loss
- Unitized Flexible Super Travel (FST) Diaphragm and Guided Plug
  - Accurate and stable regulation with smooth closing
  - Requires low opening and actuation pressure
  - Prevents diaphragm erosion and distortion

## **Typical Applications**

- Computerized Irrigation Systems
- Drip-Tape Systems
- Low Set Pressure Applications
- Remote and/or Elevated Plots
- Multiple Control Valves System
- Energy Saving Irrigation Systems

Operation

Flow Chart

The Shuttle Valve [1] hydraulically connects the Solenoid [2] or the Pressure Reducing Servo Pilot (PRSP) [3] to the Valve Control Chamber [4]. When the solenoid is closed, the PRSP commands the Valve to throttle closed, preventing Downstream Pressure [P2] from rising above setting. In response to an electric signal, the solenoid switches, directing line pressure through the shuttle valve into the control chamber, shutting the Valve. Should system pressure rise above setting, the Relief Pilot [5] opens, and thereby opening the Valve to relieve excessive pressure.
