

PRESSURE REDUCING VALVE

Normally Closed with Hydraulic Control

Model IR-120-54-3W-X

The BERMAD Normally Closed, Pressure Reducing Valve with Hydraulic Control, is a hydraulically operated, diaphragm actuated control valve that reduces higher upstream pressure to lower constant downstream pressure regardless of fluctuating demand, and opens fully upon line pressure drop. It is a Normally Closed valve, which opens in response to a remote pressure command and shuts in the absence of that command.

- [1] BERMAD Model IR-120-54-3W-X opens upon pressurerise command, and establishes reduced pressure zone protecting laterals and distribution line.
- [2] Bermad Kinetic Air Valve
- [3] Bermad Combination Air Valve

Features and Benefits

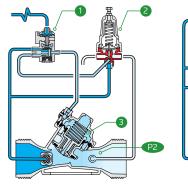

- Line pressure driven Hydraulic Control Valve Normally Close
 - Protects downstream systems
 - Opens fully upon line pressure drop
 - Amplifies and relays weak remote command
 - Closes upon control failure
- Engineered Plastic Valve with Industrial Grade Design
 - Adaptable on-site to a wide range of end connection sizes and types
 - Articulated flange connections isolate valve from line bending and pressure stresses
 - Highly durable, chemical & cavitation resistant
- hYflow 'Y' Valve Body with "Look Through" Design
 - Ultra-high flow capacity at Low pressure loss
- Unitized Flexible Super Travel Diaphragm with a Guided Plug
 - Accurate and stable regulation with smooth closing
 - Requires low actuation pressure
 - Prevents diaphragm erosion and distortion
 - Simple In-Line Inspection and Service

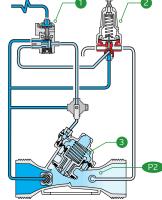

Typical Applications

- Computerized Irrigation Systems
- Pressure Reducing Stations
- Systems Subject to Varying Supply Pressure
- Distribution Centers
- Energy Saving Irrigation Systems

Operation:

The 3-Way Hydraulic Relay Valve (3W-HRV) 1 hydraulically connects the Pressure Reducing Pilot (PRP) 2 to the Valve Control Chamber 3. The PRP commands the Valve to throttle closed should Downstream Pressure Pre below pilot setting. The 3W-HRV switches upon pressure drop command, directing line pressure into the control chamber, and thereby causing the main Valve to shut. The 3W-HRV also features local manual closing.

IR-120-54-3W-X

Technical Data

Pressure Rating:

10 bar; 145 psi

Operating Pressure Range:

0.5-10 bar; 7-145 psi

Setting Range:

1-7 bar; 15-100 psi

Setting ranges vary according to specific pilot spring. Please

consult factory

Materials:

Body, Cover and Plug:

Glass-Filled Nylon

Diaphragm:

NR, Nylon fabric reinforced

Seals: NR

Spring: Stainless Steel

Cover Bolts: Stainless Steel

Control Accessories:

Tubing and Fittings:

Plastic

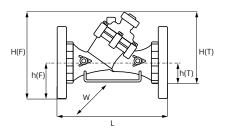

Pilot Spring Range:

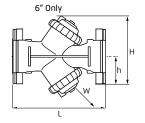

| Spring | Spring color | Setting Range |
|--------|-----------------|------------------|
| J | Green | 0.2-1.7 bar |
| K | Gray | 0.5-3.0 bar |
| N | Colorless | 0.8-6.5 har |

Technical Specifications

Y Pattern Valves Dimensions & Weights
