

The BERMAD Model IR-120-DC-3W-XZ Pressure Reducing Valve is a double chambered, hydraulically operated, diaphragm actuated control valve that reduces higher upstream pressure to lower constant downstream

pressure and opens fully upon line pressure drop. The valve comprises two major components: The body and the actuator assembly. The actuator assembly consists of both an upper and a lower control chamber.

The double chambered valve operation is independent of valve differential pressure. This develops maximum power, ensuring immediate valve response combined with inherent soft closing.

- [1] BERMAD Model IR-120-DC-3W-XZ reduces the supply pressure to preset pressure, protecting the system
- [2] BERMAD Solenoid Control Valves Model IR-210
- [3] BERMAD Combination Air Valve Model IR-C10
- [4] BERMAD Kinetic Air Valve Model IR-K10
- [5] BERMAD RF RTU Battery Operated with Solar Kit

Features & Benefits

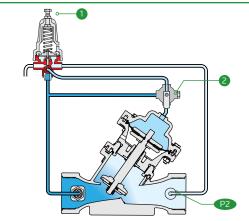

- Line pressure driven, Hydraulically Controlled
 - Protects downstream systems
 - Opens fully upon line pressure drop
- Double chamber
 - Full powered opening and closing
 - Decreased pressure loss
 - Low throttling noise
 - Non-slam closing characteristic
 - Protected diaphragm
- Engineered Plastic Valve with Industrial Grade Design
- hYflow 'Y' Valve Body with "Look Through" Design
 Ultra-high flow capacity Low pressure loss
- User-Friendly Design
 - Simple in-line inspection and service

Typical Applications

- Pressure Reducing Stations
- Systems Subject to Varying Supply Pressure
- Energy Saving Irrigation Systems

Operation:

The Pressure Reducing Pilot ① commands the main Valve to throttle closed should Downstream Pressure ② rise above pilot setting, and to open fully when it drops below pilot setting. The Manual Selector ② enables local manual closing.

100-DC Series h**Y**flow Pressure Reducing

Technical Data

Pressure Rating: 10 bar; 145 psi

Operating Pressure Range: 0.5-10 bar; 7-145 psi

Setting Range:

1-7 bar; 15-100 psi Setting ranges vary according to specific pilot spring. Please consult factory

Materials:

Body, Cover and Plug: Polyamid 6 & 30% GF

Diaphragm:

NR, Nylon fabric reinforced **Seals:** NR

Spring: Stainless Steel Cover Bolts: Stainless Steel

Actuator: Composite Material & Stainless Steel

Control Accessories:

Tubing and Fittings: Polyethylene

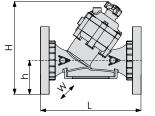

Pilot Spring Range:

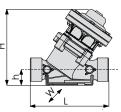

Spring	Spring color	Setting Range			
J	Green	0.2-1.7 bar			
K	Gray	0.5-3.0 bar			
N	Colorless	0.8-6.5 bar			

Y Pattern Valves Dimensions & Weights
