

Electrically Controlled Deluge Valve with Remote Reset

Model FP 400Y - 3U

The BERMAD model 400Y-3U is an elastomeric, hydraulic, line pressure operated deluge valve, designed specifically for advanced fire protection systems and the latest industry standards.

The 400Y-3U is activated by a 3-way solenoid valve which in turn activates a 3 way relay valve to open the deluge valve.

It is available with a latching option that maintains the deluge valve open until de-latched remotely

The 400Y-3U is ideal for systems with open nozzles for water or foam discharge and is offered with electric components to suit any hazardous location.

The optional valve position indicator can include a limit switch suitable for Fire & Gas monitoring systems.

(for Illustration Only)

Benefits and Features

- **Safety and reliability**
 - Time proven, simple, fail-safe actuation
 - Single piece, rugged elastomeric diaphragm seal - VRSD technology
 - Obstacle-free, uninterrupted flow path
 - No mechanical moving parts
 - Valve position limit switches (optional)
 - Local valve position indicator beacon (optional)
- **High performance**
 - Very high flow efficiency
 - Straight through flow Y- type body
 - Approved for PN25 / 365 psi
- **Designed for fire protection**
 - Face-to-face length standardized to ISO 5752 / EN558-1
 - Latching option
 - Meets the requirements of the industry standards
- **Quick and easy maintenance**
 - In-line serviceable
 - Fast and easy cover removal
 - Swivel mounted drain valves*

* not including 1½" & 2" valves

Typical Applications

- Electric fire detection systems with control panels
- Automatic water spray systems
- Foam applications
- Corrosive water systems

Approvals

UL-Listed
Special System Water Control Valves, Deluge Type (VLFT)
Sizes 1.5" - 16"

FM Approved
for Deluge Sprinkler Systems
Sizes 1½" - 8"

Det Norske Veritas
Type Approval

ABS
American Bureau of Shipping
Type Approval

Lloyd's Register
Type Approval

Additional Features

- Valve position limit switches
- Local valve position indicator beacon
- Seawater compatibility
- Remote de-latch
- Drain valve/s inlet/outlet

Operation

(for Illustration Only)

Valve Closed (normal conditions)

Valve Open (fire conditions)

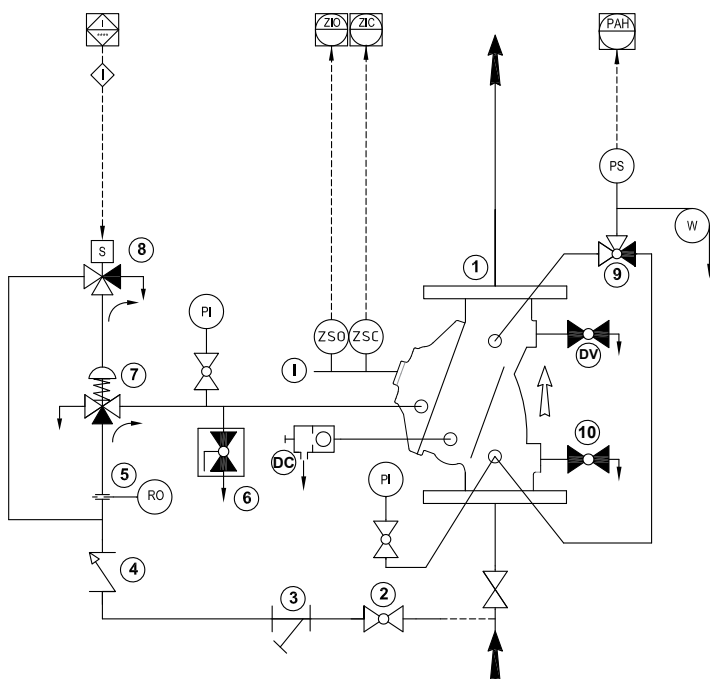

The BERMAD model 400Y-3U is held closed by water pressure in the control chamber [1]. Upon release of pressure from the control chamber, the valve opens.

Under NORMAL conditions, water pressure is supplied to the control chamber by a priming line [2] and strainer [3], and is then trapped in the control chamber by a check valve [4], restriction orifice [5], manual emergency release [6], and a relay valve (URV) [7] that is held in the supply position by line pressure supplied through a three-way solenoid valve [8]. The water pressure trapped in the control chamber of the deluge valve holds the diaphragm against the valve seat, sealing it drip-tight and keeping the system pipes dry.

Under FIRE conditions, water pressure is released from the control chamber, either with the manual emergency release, or by the URV switching to the release position. The URV switches position in response to the solenoid valve being activated by the fire & gas control system [C]. This opens the deluge valve allowing water to flow into the system piping and to the alarm device.

When the Magna latch solenoid is specified for FM approval: model 400Y- 3U with H2 suffix (see code designation on page 4), the deluge valve will latch open until reset remotely.

System P&ID

Components

- 1 Bermad 400Y Deluge Valve
- 2 Priming Ball Valve
- 3 Priming Strainer
- 4 Check valve
- 5 Restriction Orifice
- 6 Manual Emergency Release
- 7 URV-3-M Relay Valve
- 8 3 way Solenoid Valve

Optional System Items

- ZS Limit Switch Assembly
- PS Pressure Switch
- W Water Motor Alarm
- I Visual Indicator
- DV Additional Drain/Test Valve
- DC Automatic Drip Check Valve*
- 10 Drain Valve*
- 9 3-Way alarm test valve*
- PI Pressure Gauge*

See also Factory Fitted Options under the Valve Code Designations on the last page

*Mandatory for FM approval

(suffix A in code designations on page 4)

System Installation

A typical installation of the BERMAD model 400Y-3U features automatic actuation via a universal relay valve, triggered electrically by a signal from a fire & gas control system or an on-site emergency pushbutton. When open and fitted with a limit switch the valve can send a feedback signal to a remote valve status monitoring system.

Optional System Items

(for Illustration Only)

Engineering Specifications

The deluge valve shall be UL-listed and FM-approved, 25-bar/365-psi rated, elastomeric type, with a straight-through, Y-type body.

The valve shall have an unobstructed flow path, with no stem guide or supporting ribs.

Valve actuation shall be accomplished by a single-piece, rolling diaphragm bonded with a rugged radial seal disk.

The diaphragm assembly shall be the only moving part.

The deluge valve shall include a relay pilot valve, a latching FM approved 3-way solenoid valve with a tolerance of 35% below the rated voltage, a Y-type strainer, a ball drain valve, an automatic drip-check with manual override, 4-inch pressure gauges, and a manual emergency release housed in a stainless steel box.

The valve shall be equipped with a dual-color, rotational position indicator, readable from 50 meters and with two limit switches enclosed in a protective switch box.

Removing the valve cover for inspection or maintenance shall be in-line and not require removal of the trim.

The deluge valve and its entire control trim shall be supplied pre-assembled and hydraulically tested by a factory certified to ISO 9000 and 9001 standards.

Technical Data

Available Sizes (inch)

- Flanged - 1½, 2, 3, 4, 6, 8, 10, 12, 14 & 16"
- Grooved - 1½, 2, 3, 4, 6 & 8"
- Threaded - 1½ & 2"

Pressure Rating

- ANSI#150 - 16 bar / 235 psi
- ANSI#300 - 1½" to 10" 25 bar / 365 psi
12" to 16" 20 bar / 300 psi
- Grooved/Threaded - 25 bar / 365 psi

Elastomer

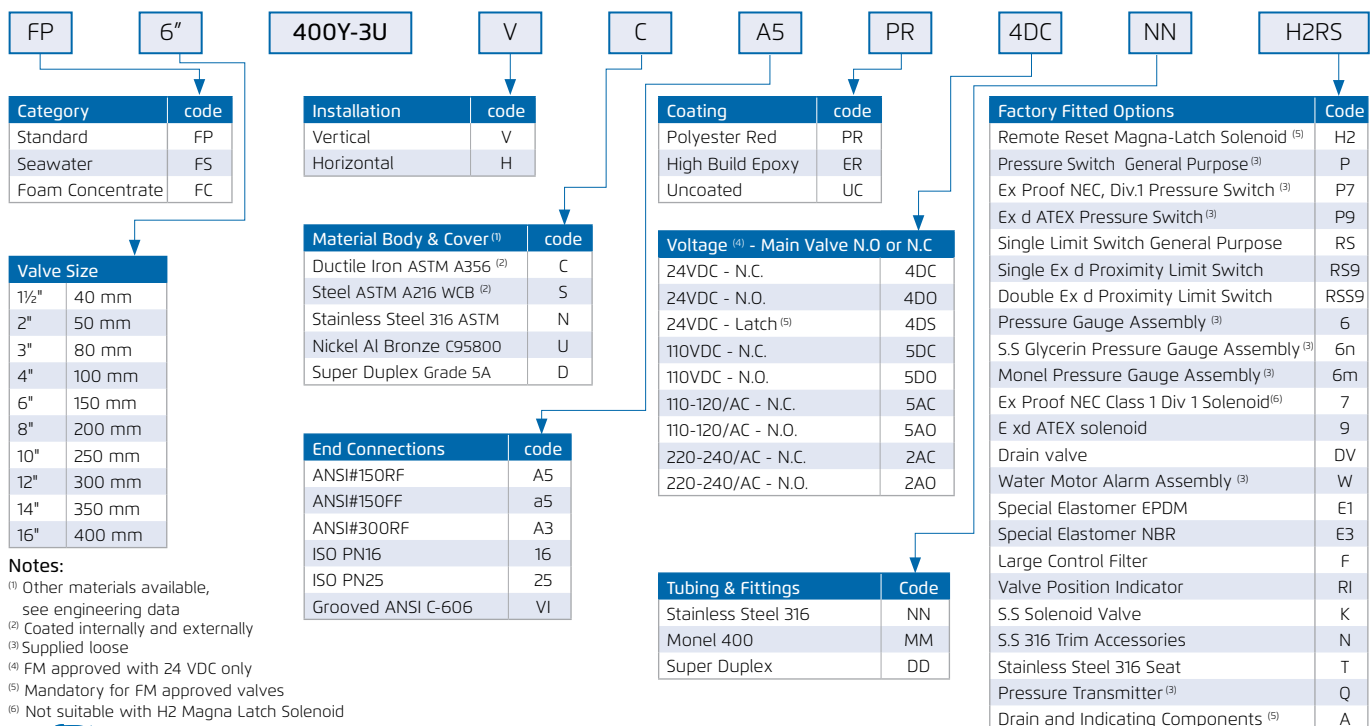

- HTNR - Fabric Reinforced High Temperature Compound - See engineering data
