

Next Generation Air Control

Irrigation

Air Valves Series

BERMAD's advanced line of air valves joins its extensive line of hydraulic control valves to create comprehensive control solutions for pressurized pipelines and networks. System engineers and end-users can design and install far more optimized solutions for their air control requirements.

The new line of BERMAD Air Valves include Metal Air Valves ranging from inlet sizes of 2";DN50 to 10";DN250 and Plastic Air Valves from inlet sizes of 3/4";DN20 to 3";DN80 for a variety of Irrigation networks and operating conditions.

- Higher flow rates
- Low pressure sealing
- Minimal spray effect
- Built-in surge protection (anti-slam feature)
- Versatile design for easy installation
- Reliable structure

BERMAD continues its long tradition of meeting customer needs with efficient, convenient and cost-effective solutions bringing to market today's most advanced air valves for Irrigation, Waterworks and Sewage systems.
