

Hydrometer

**Magnetic Drive
with Solenoid Control**

IR-910-M0-RX

The BERMAD Hydrometer with Solenoid Control integrates a vertical turbine Woltman-type water meter with a diaphragm actuated hydraulic control valve. The impeller drive is magnetically coupled to a vacuum-sealed meter register in the control head. As the system's Flow Meter and Main Valve, it controls system irrigation together with the irrigation controller. The BERMAD Model IR-910-M0-RX opens and shuts in response to an electric signal.

Two parallel pulses are transmitted. Other pulse rates are available on request.

Line Pressure [1] is applied to the Control Chamber [2] through the opened 3-Way Solenoid [3]. This creates superior closing force that moves the Diaphragm Assembly [4] toward a closed position. Closing the quickens solenoid causes it to discharge pressure from the Hydrometer control chamber opening it.
For Hydrometers of 6-10"; DN150-250 diameter, a 3-Way Hydraulic Relay Valve (3W-HRV) [5] accelerates Hydrometer response.
