

BERMAD Fire Protection

CIBA Chemical plant Pressure reducing system

Project Name	CIBA Chemical plant
Country	Singapore
Segment	Fire Protection
Application	Pressure Control Valves
Bermad Solution	Parallel Pressure reducing station, including 2X Bermad FP720UL and 2 X Bermad FP730UF Pressure reducing system with high capacity While need to be UL listed as Per NFPE codes

BERMAD Fire Protection

CIBA Chemical plant Pressure reducing system

Optional Text	<p>CIBA chemical plant is located in Jorjung Island in Singapore and get the water supply for the fire protection system from the 'Keppel" line which holds high flow and pressure.</p> <p>A pressure reducing system was required to reduce the pressure at the entrance to the site fire fighting system while the Pressure reducing valves used must be UL –Listed.</p> <p>Bermad installed a Parralel Pressure reducing station with NC bypass valves.</p> <p>Both Pressure reducing valves installed are rated for class #300 and include a class #300 pressure relief valve installed at the downstream of each pressure reducing valve</p>
